

Transcend™ Ultra- High Performance Stretch Machine Film

Product Information Sheet

Product Description

Transcend™ Ultra- High Performance Stretch Machine Film. Developed with proprietary MAC™ technology to withstand the most challenging wrapping scenarios. Toughness to withstand rough equipment and a wide range of operation conditions, Robustness in its ability to wrap C-loads, withstanding puncturing and preventing punctures. Reliable performance in most environments, including cold, freezer, and various levels of humidity. Options -> Width: 20 and 30 inch. Gauge: 40,47,50, 55, 65, 80.

Circular Solutions

Reduced Carbon Footprint*

* Vs. previous generation of Berry product

Features and Benefits

- Toughness to withstand rough equipment and a wide range of operation conditions
- Robustness in its ability to wrap C-loads, withstanding puncturing and preventing punctures from developing into web failures
- Efficiency in operations: fewer film breaks equals less down time
- Sustainability: use less film, reduce costs, and waste

Load Types - Ideal for the following

- A, B, and C loads
- Ability to downgauge for A and some B loads
- Awkward and heavy materials such as stone, brick, wood, etc.
- Products that have high puncture probability

Wrapping Environment

- Reliable performance in most environments, including cold and freezer
- Humidity: high, medium, or low

Equipment

- Overhead straddle, turntable, or both

INNOVATION FOR THE WORLD
SOLUTIONS FOR YOU

- Recommended RPM range: all
- Optimal pre-stretch range: 200%, up to 300% (thickness and application dependent)

Targets for Replacement

- Transcend 47–55ga films—replacing commodity-type films of 70–80ga
- Transcend 40ga—replace high performance 45–60ga films

Regions Available

Mexico, Central America & Caribbean, North America, South America
